Summary

Engineering Delivery Partner with strong experience in enterprise platforms, cloud operations, and product delivery. Expert at aligning business goals with modern infrastructure and leading cross-functional teams to ship reliable software.

Experience

DevOps Engineer - AeroScale | Jul 2024 - Present

Berlin, Germany

- Drove cloud migration and automation efforts to reduce cycle time and strengthen security posture.
- Coordinated stakeholder reporting, roadmap planning, and delivery governance for multiple cross-functional teams.
- Led product and platform initiatives at AeroScale to improve developer efficiency and operational visibility.
- Built reusable infrastructure patterns and observability workflows to support high-growth launches.

Cloud Engineer - AeroScale | Sep 2022 - Jul 2024

Berlin, Germany

- Built reusable infrastructure patterns and observability workflows to support high-growth launches.
- Led product and platform initiatives at AeroScale to improve developer efficiency and operational visibility.
- Coordinated stakeholder reporting, roadmap planning, and delivery governance for multiple cross-functional teams.
- Drove cloud migration and automation efforts to reduce cycle time and strengthen security posture.

DevOps Engineer - Beacon Systems | Feb 2017 - Sep 2022

Berlin, Germany

- Coordinated stakeholder reporting, roadmap planning, and delivery governance for multiple cross-functional teams.
- Drove cloud migration and automation efforts to reduce cycle time and strengthen security posture.
- Led product and platform initiatives at Beacon Systems to improve developer efficiency and operational visibility.
- Built reusable infrastructure patterns and observability workflows to support high-growth launches.

Platform Lead - Orbit Analytics | Oct 2013 - Feb 2017

India

- Led product and platform initiatives at Orbit Analytics to improve developer efficiency and operational visibility.
- Built reusable infrastructure patterns and observability workflows to support high-growth launches.
- Coordinated stakeholder reporting, roadmap planning, and delivery governance for multiple cross-functional teams.
- Drove cloud migration and automation efforts to reduce cycle time and strengthen security posture.

Education

Bachelor of Engineering in Software Engineering - Monash University

2013 - 2015

MSc in Information Systems - Imperial College

2009 - 2013

Skills

Product Management

User Story Mapping, Roadmap Strategy, Stakeholder Alignment, Value Proposition, Release Planning, Market Research

Cloud & Platform Engineering

Infrastructure as Code, Platform Automation, Kubernetes, Service Reliability, Observability, AWS

Programming & Frameworks

Mia Murphy

Engineering Delivery Partner

Docker, Node.js, Python, GraphQL, React, TypeScript

Tools & Observability

Confluence, Miro, Datadog, New Relic, Jira, GitHub

Development Practices

CI/CD, DevSecOps, API Design, Microservices, TDD, BDD

Industry Expertise

Cloud Platforms, Digital Transformation, Platform Modernization, Security & Compliance, Customer Experience

Certifications

Professional Scrum Master I, Microsoft Certified: Azure Fundamentals, Google Cloud Digital Leader

Recommendations

LinkedIn Recommendation

Product Partner - Engineering Lead

Delivers clear strategy across product, engineering, and business stakeholders with calm confidence.

LinkedIn Recommendation - <https://www.linkedin.com/in/miamurphy/details/recommendations/>

Operations Lead - Engineering Lead

Builds strong team momentum through structured planning, transparent communication, and technical credibility.

LinkedIn Recommendation - <https://www.linkedin.com/in/miamurphy/details/recommendations/>

Experiments

Velocity Dashboard (full-stack)

Backend: Docker, Terraform, FastAPI, Kubernetes

Frontend: React, GraphQL, Vanilla JS, HTML

- Built a scalable backend with modern cloud-native tooling.
- Designed secure API contracts and reusable architecture patterns.
- Created a polished frontend experience with responsive UI patterns.
- Integrated live data flows and developer-friendly build tooling.
